- InPatient Leaders

## CAROLINAS CENTER for Joint & Spine

Carteret General Hospital is very proud to announce the addition of Carolinas Center for Joint & Spine. Here we are able to offer specialized procedures specific to joint replacements and treatments as well as spine attention.

Patients who participate in Carolinas Center for Joint and Spine receive the best medical and information technology in a supportive environment that focuses on their well-being. Participants begin a process that will allow them to lead happier and more active lives, returning to activities that bring joy into their lives, such as gardening, fishing, traveling and golf.

Orthopedic surgeons caring for patients in the Joint & Spine Center use the latest in surgical techniques including joint replacement, spine surgeries, arthroscopy, and minimally invasive partial joint replacement surgery. All are board certified in orthopedic surgery; they ensure the highest level of care for all patients. Following

surgery they will visit patients on a routine basis, monitoring all progress, and determine the appropriate therapies to assure a faster recovery for their patients.

Joint patients participate in individualized and group therapy sessions during their hospital stay. In this atmosphere of camaraderie, caring and sharing; patients receive comprehensive treatments and group support. An open door policy allows family members to spend as much time with their loved ones as their schedule allows. Family members are trained to be "coaches" so they can assist in home care.

The nurses and physical therapists demonstrate a compassionate, patient-centered approach to care. They have been chosen for their clinical expertise and positive attitude to help you start each day with a smile. They work closely with your physician to personalize your care throughout the program. You will experience teamwork and camaraderie at its best! ♦
